Predicted trends in long term breast cancer survival in

Trends in long-term relative survival from breast cancer are examined for women diagnosed in England and Wales up to 2001, using both period and hybrid approaches. Large improvements in long-term survival are predicted. Women with breast cancer still experience persistent excess mortality up to at least 20 years after diagnosis.

Trends in breast cancer incidence survival and mortality

The continuing fall in breast cancer mortality in England and Wales reported by Richard Peto and colleagues (May 20, p 1822)¹ is extremely welcome. We agree that improvements in the management of breast cancer since the 1970s have prevented large numbers of breast cancer deaths in middle age. This is reflected in the mortality trends, but it is
