springer, In this text, a theory for general linear parabolic partial differential equations is established which covers equations with inhomogeneous symbol structure as well as mixed-order systems. Typical applications include several variants of the Stokes system and free boundary value problems. We show well-posedness in L_p - L_q -Sobolev spaces in time and space for the linear problems (i.e

General parabolic mixed order systems in Lp and applications

To be more precise, we establish results about mixed order systems on L_p , which help us to give elegant and short proofs of the well-posedness of linear parabolic problems. For the treatment of non-linear partial differential equations a thorough understanding of the associated linearized problem is indispensable.
