One of several important issues that inform contemporary philosophy of chemistry is the issue of structural explanation, precisely because modern chemistry is primarily concerned with microstructure. This paper argues that concern over microstructure, albeit understood differently than it is today, also informs the chemical philosophy of Robert Boyle. According to Boyle, the specific

Philosophy of chemistry is the systematic critical study of these concepts, theories, and methods, and of the interrelations between them. This involves reflection on the ways in which they are related to, and potentially distinct from, the concepts, theories, and methods of other sciences. Since the late eighteenth century, chemists have investigated the composition of chemical substances in
