Structure borne sound Article about structure borne

There are two types of sound that may have leaked from the sender's room: structure-borne sound (caused, for example, by senders stamping their feet on the floor or striking their hands against the arms of the chair) and airborne sound (caused, for example, by senders giving off vocal cues of delight or encouragement).

Structure Borne Sound Structural Vibrations and Sound

Structure-Borne Sound" is a thorough introduction to structural vibrations with emphasis on audio frequencies and the associated radiation of sound. The book presents in-depth discussions of fundamental principles and basic problems, in order to enable the reader to understand and solve his own problems. It includes chapters dealing with measurement and generation of vibrations and sound

Sound Transmission Loss of Panels SpringerLink

Abstract. In general, the noise level inside a building or structure is determined by the transmission of air-borne sound from external and internal acoustic sources and by structure-borne sound induced by some mechanical sources.

Classification and Simulation Method for Piezoelectric

The piezoelectric polymer Polyvinylidene fluoride (PVDF) holds the potential to be the core material of novel structure-borne sound sensors not only in research but also in industrial applications.
