Theory produces new experimental ideas and conversely, a host of experimental data add another vista to new theories. Due to the mutual beneficial effect of theory and experiment this book will always retain its value, although the quantum-chemical approach to the theory of reactivity is, of course, still in the developmental stage.

The theory is predicated on the belief that people have a natural inclination to strive toward self-fulfillment. the goal is to help patients self-actualize through self-examination, self-mastery, and creative expression. Freedom of choice or self-determination, is a core value of the treatment.

Humanistic therapists use open-ended responses, reflective listening and tentative
