A combination therapy for treating osteoarthritis is disclosed. The combination therapy includes the co-administration of a steroid and Zoledronic Acid. The coadministration of a steroid decreases the production of cytokines, and, therefore, decreases the pro-inflammatory effects of Zoledronic Acid. The co-administration of Zoledronic Acid with

The patches are based on a hydrogel structure whose hydrophilicity actively absorbs fluid from the surrounding tissue, resulting in an expansion of the needle core creating pores and nano-channels

through which the therapeutic agent can diffuse . A core advantage of this approach centres on the use of the baseplate as a reservoir for the drug which is capable of transport through the swollen

**Cell Cell division and growth Britannica com**

Cell division and growth In unicellular organisms, cell division is the means of reproduction; in multicellular organisms, it is the means of tissue growth and maintenance. Survival of the eukaryotes depends upon interactions between many cell types, and it is essential that a balanced distribution of types be maintained.
